

Adrich Fernandes

Backend Developer: (Node.js, Express.js, RESTful API)

Phone: +91 7899642377 Email: adrichancyfernandes@gmail.com | [LinkedIn](#) | [Github](#) | [Portfolio](#) |

Kumta, Karnataka – 581343

Technical Skills

Languages: python, JavaScript (ES6+)

Frontend: React.js, Tailwind CSS, HTML5

Backend: Node.js, Express.js, RESTful API Development, JWT Authentication Authorization.

Database Management: MongoDB, MySQL,

Cloud: Microsoft Azure

Tools & Technologies: Git, GitHub, Postman, VS Code, Docker

Internship

MERN-Stack – Unified Mentor: Developed a Product Management Dashboard using the MERN stack that enables adding and viewing product details via a form and a data table. Build REST APIs with Node.js and Express.js, integrated MongoDB for data persistence, and designed a responsive React-based user interface

projects:

AI Resume Builder | [Repository](#) | [view](#) | React.js, Node.js, Express.js, MySQL, Google Gemini AI, Cloudinary, Vercel

- Built and deployed a full-stack AI-powered resume builder that helps users create, optimize, and export professional resumes with real-time preview and PDF download
- Integrated Google Gemini 2.5 Flash API to analyze resumes against job descriptions, generating ATS match scores (0–100) with actionable add, remove, and keep suggestions
- Implemented JWT-based authentication with secure user registration, login, and protected API routes using bcrypt password hashing and middleware-based access control
- Utilized Cloudinary with Multer for resume file uploads and Mammoth.js for DOCX parsing to extract raw text for AI analysis
- Enabled persistent analysis history allowing authenticated users to save multiple resumes, run repeated analyses against different job descriptions, and track optimization progress

GreenNest | [Repository](#) | [view](#) | React.js, Node.js, Express.js, MongoDB, Clerk, Nodemailer

- Built a full-stack plant e-commerce and gardening services platform with a three-app architecture customer frontend, admin panel, and gardener dashboard — sharing a single REST API backend
- Implemented complete e-commerce functionality including product browsing, cart management, order placement with real-time status tracking, cancellation, and return/refund workflows
- Developed a gardener booking system allowing users to schedule, reschedule, and cancel appointments, with a dedicated gardener dashboard for managing incoming requests
- Integrated Clerk authentication with role-based access control (User, Admin, Gardener) using custom middleware and route guards for secure, role-specific page access
- Built an admin panel with a real-time dashboard, full CRUD for products, order/return management, gardener management, and a support query ticket system with status tracking and admin replies

Education

Dr. A.V. Baliga College of Arts and Science (Karnataka University Dharwad)

Bachelor of computer application

2023-2026

(CGPA:8.05/10)
